

The European Research Centre for Drug Discovery and Development
NatSynDrugs

is seeking candidates for a post doctoral position
(Medicinal Chemistry/Organic Chemistry)

Department of Pharmaceutical and Applied Chemistry
University of Siena
Prof. Giuseppe Campiani

www.natsyndrugs.org and <http://www.unisi.it/ricerca/dip/dfct/index.html>

Job description:

As part of our medicinal chemistry project team at the Department of Pharmaceutical and Applied Chemistry (University of Siena), NatSynDrugs is seeking post-doctoral candidates (preferably from EU States) for the synthesis of novel biologically active compounds using state-of-the-art organic chemistry techniques. Your research is expected to contribute to the identification and optimization of innovative drugs in the field of neglected diseases.

Your profile:

The ideal candidate will have a PhD in organic chemistry or medicinal chemistry with experience in multi-step organic synthesis, enantioselective synthesis, purification techniques and structural characterization of organic molecules. Moreover, the ability to work in a multidisciplinary research team as well as effective communication skills and a good mastery of the English language is essential. The initial evaluation of candidates will mainly rely on the scientific level of their publications.

Additional info:

please surf our web site at www.natsyndrugs.org and or contact Prof. Giuseppe Campiani preferably by e-mail: campiani@unisi.it.

If you are interested to this position, please send us a detailed CV, preferably by e-mail, indicating the object of the mail as: post-doc application, to:

Sabina Parente

Administrative Assistant
