

Stem cells

Studying stem cells and their differentiation represents a new frontier in evolutionary biology and a possible treatment for many human pathologies. Knowledge of stem cells is complex and needs further analysis, because of the importance of this discipline from different points of view (scientific, medical, ethical and social).

Stem Cells

October 2010

LECTURES

Fetal Programming of Health in
Later Life

4 October 2010
h. 13.30 - Aula 10
Policlinico S. Maria
alle Scotte

Infection and Preterm Birth

5 October 2010
h. 13.30 - Aula 10
Policlinico S. Maria alle
Scotte

The Stress Axes in Pregnancy

6 October 2010
h. 13.30 - Aula 10
Policlinico S. Maria alle
Scotte

Regulation of Fetal Growth

12 October 2010
h. 13.30 - Aula 10
Policlinico S. Maria alle
Scotte

Future Perspectives in Trophoblast
Investigation

Chair in **Stem Cells**

Prof. John R.G. Challis
