AND IMPLICATIONS
OF DIGITAL
FABRICATION

FAB ACADEMY 2016

JANUARY 2016

Fab Academy is a 5-month part-time learning experience where students plan and execute a new project each week. At Fab Academy you will learn how to envision, prototype and document your ideas through many hours of hands-on experience with digital fabrication tools. It is a distributed educational model in which students receive global lectures broadcasted from MIT in addition weekly lecture and assignments developed in the local branches of the Fab Academy.

Directed by **Neil Gershenfeld**
