PhD Day 2021

Department of Life Sciences
20 September 2021

Polo Didattico San Miniato Aula Magna

PROGRAM

8:45	Welcome Reception	13:00	Lunch Break
9:00	Opening Ceremonies	14:00	Faraa Amer Amed Ghalb Modulation of vascular activity of flavonoids by Perivascular adipose tissue in rat aorta rings
9:20	Altera Annalisa Faecal microbial transplant in ageing and click chemistry as a tool to visualise gut bacteria-derived molecules	14:20	Fragni Debora Identification of novel readouts to assess antifibrotic efficacy of new compounds in a bleomycin-induced pulmonary fibrosis mouse model
9:40	Casa Elisa Cell based assays used to quantify neutralizing antibodies against SARS-CoV-2 in human samples	14:40	Passaponti Sofia The role of the placenta on the RANK/RANKL/OPG axis
10:00	Cesare Maria Michela Antioxidant protection of tomato skin polyphenols in a cellular model of sarcopenia	15:00	Coffee Break & Poster Session
10:20	Coffee Break & Poster Session	15:40	Petrone Paola Development of a new computerized system for morphometric analysis of human erythrocytes in SEM micrographs: potential application in the research of biomarkers for autism spectrum disorders.
11:00	Chiaino Elda Role of Cytochrome P450 against toxic insult in differentiated neuroblastoma cells SH-SY5Y	16:00	Poggioni Letizia Morphological, molecular and nutraceutical characterization of <i>Lycium barbarum</i> L. plants cultivated in Maremma.
11:20	Conti Veronica Local Italian tomato (<i>Solanum lycopersicum</i> L.) cultivars under drought stress: morpho-physiological, biochemical and nutraceutical aspects.	16:20	Closing Remarks
11:40	Esposito Salsano Jasmine Nutraceutical Properties of Extra-Virgin Olive Oils and Leaves Extracts from Autochthonous Tuscan Olive Trees		
12:00	Seminar held by Prof. Cosima Tatiana Baldari The ERC funding scheme: a unique opportunity for basic reserach		Prof Massimo Valoti
