Concept Note

THE PLASTIC BUSTERS CAP IN A NUTSHELL

The Plastic Busters CAP is an ENI CBC MED funded project aiming to facilitate decision-makers and stakeholders in effectively tackling the problem of marine litter by integrating EbM (Ecosystem-Based Management Approach) into ICZM (Integrated Coastal Zone Management) planning towards good environmental status. The project entails actions that address the entire management cycle of marine litter, from monitoring and assessment to prevention and mitigation actions. Plastic Busters CAP is a 24 month -long project, with a total budget of €1.109.976,27 million and is co-funded by the European Union under the ENI CBC MED Programme 2014- 2020. It brings together partners from 7 countries of the Mediterranean region, namely Egypt, Greece, Italy, Jordan, Lebanon, Spain and Tunisia.

The backbone of Plastic Busters CAP is the Interreg Med Plastic Busters MPAs; both projects deploy the multidisciplinary strategy and common framework of action developed within the Plastic Busters Initiative led by the University of Siena and the Sustainable Development Solutions Network Mediterranean. This initiative frames the priority actions needed to tackle marine litter in the Mediterranean and was labelled under the Union for the Mediterranean (UfM) in 2016, capturing the political support of 43 Euro-Mediterranean countries.

THE AIM OF THE PLASTIC BUSTERS CAP FINAL HYBRID CONFERENCE

The conference will feature and fully exploit the knowledge, know-how, experience and lessons learned obtained by the implementation of the Plastic Busters CAP and the Plastic Busters Initiative demonstration and replication actions addressing the entire management cycle of marine litter, from monitoring and assessment to prevention and mitigation.
