The behaviour you must follow: when you are with other people

ALWAYS KEEP A SOCIAL SECURITY DISTANCE OF 1.8 METER

USE THE MASK:
- everytime you are in open or closed spaces with several people
- in public transportation or in taxi and car rental with driver.

Remember that using a mask helps limiting the virus spread but you still have to guarantee a highly frequent hand wash and an efficient respiratory hygiene.

It is important to wear and dispose the mask correctly, otherwise it can be itself a source of infection.

How to wear it
• Before touching the mask, wash your hands carefully with soap and water or with an alcohol gel.
• Put on the mask by taking it from the side ends.
• Cover your mouth and nose and adjust it till it fit your face well.
• Avoid touching the mask while you have it on and, if you do, wash your hands.

How to take it off
• Take the mask off by holding it from the side ends and bring it forward.
• Do not touch the front of the mask with your hands.
• Wash your hands with soap and water or use the alcoholic gel immediately after it.
